Thinking about moving to the Cloud? You are not alone.

88% of organizations are using the public cloud in some capacity. Getting started and determining the highest value usage for you is the key.

Our Azure Cloud Workshop can help you determine which benefits from working in the cloud are best for your business. Our experts use analysis tools, interviews with your key stakeholders, and discovery of your current business processes to provide you with recommendations for moving into the cloud.

### Top Areas to Explore

- **Azure Site Recovery (ASR)** enables organizations of all sizes to create a DR solution that is cost effective and easy to implement, test, and manage.
- **Azure Backup** provides an Azure-based service you can use to protect and recover your data securely using the Microsoft cloud.
- **StorSimple Virtual Array** allows organizations to increase their available storage, handle backups, and plan for a disaster.
- **Hybrid Networking** can seamlessly extend your datacenter to the cloud for bottomless capacity, continuous availability and lower storage costs.
- **Identity** allows you to create a single identity for each user across your hybrid enterprise, keeping users, groups and devices in sync.

### Key Activities

- Project kickoff
- Workshop inclusive of white-boarding session
- Environment analysis
- Findings report review

### Next Step:
