

# Get Started with Power BI

## Turn your data into Business Insights!

Information is the lifeblood of your organization. An explosion of data, disparate data sources, and enabling access whenever, wherever are just some of the challenges that most companies face in developing an effective Business Intelligence solution. Power BI is a cloud-based business analytics service that gives you a single view of your most critical business data.

### Struggling to figure out where to start?

Our Business Intelligence Assessment helps uncover your business needs and creates a plan and approach for a BI solution. It includes:

- Envisioning session with key stakeholders
- Review of existing data sources, quality, and any information gaps
- Creation of a BI Roadmap with recommendations, scope, and estimates for an implementation aligned with the needs of the business

### Deliverable

- Findings review and recommendations for BI Strategy and Adoption

### Ready to take it for a test drive?

A Power BI pilot can help you better understand the possibilities of the solution. We will work with you to:

- Identify a business process and right size for a pilot
- Create the necessary Power BI reports and dashboard
- Deploy the reports and dashboard to a Power BI site
- Demonstrate the solution to the business for a hands-on experience
- Discuss operationalizing for production use

### Deliverable

- Functional Power BI Dashboard and actionable next steps

## Peters & Associates

- Nationally recognized
- Serving client technology needs for 40 years
- Key vendor partnerships
- Microsoft Gold certified partner
